

## + Intro

- Working with CNN's allow us to identify things in every part of the image.

## + Explore an impactful real-world solution

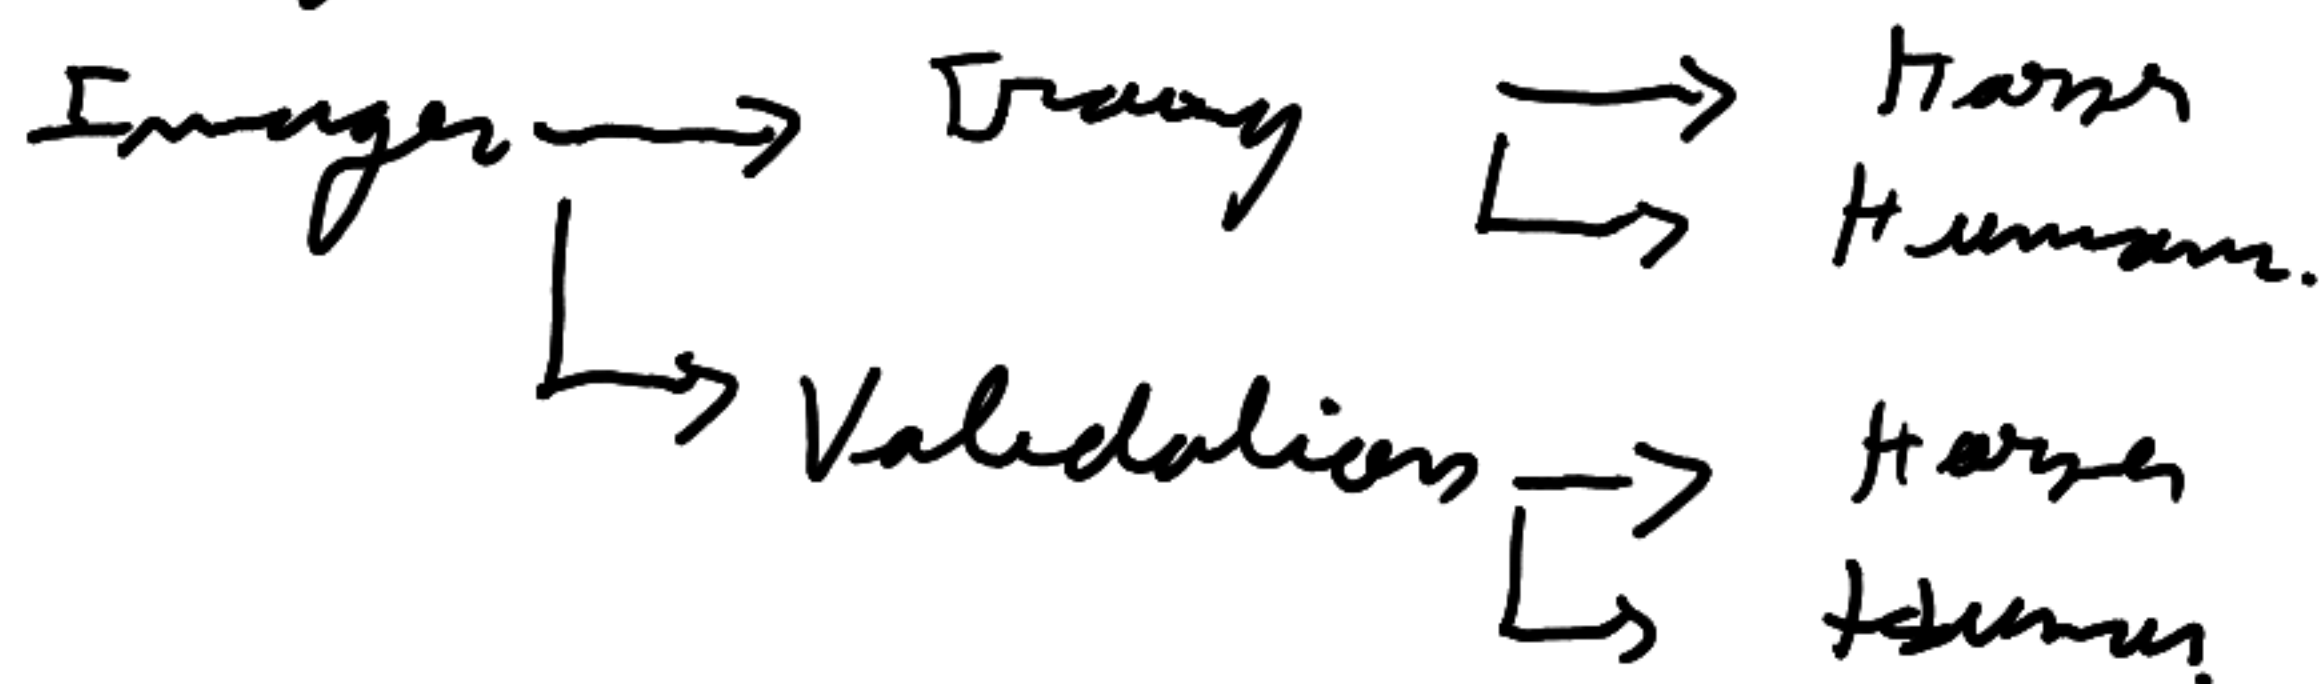

Detecting diseases on plants.

On a phone.

## + Understanding Image Generators

- + Different locations, subjects
- + Leading data APIs
- + Image Generator

Binary vs categorical or an ontology.

Always point to the directory.

Resizing images (Target-size)

→ Batches

→ Command => Binary for now.

If we use an image generator, we need to set the generator + step so it covers all images.
